

- High cycle life
- Cost effective ball valve alternative
- High operating safety:
 - Maintenance-free spring loaded packing with intermediate relief and wiper
 - Self aligning PTFE seal/plug
- Optical position indication standard
- Cost-savings in operation due to minimized control air consumption
- Low Lifecycle costs

The pneumatically-operated 2/2-way Y-pattern valve is operated by an ultra-compact piston actuator. Despite the small dimensions of the actuator, high pressure can be switched without problems.

The Y-pattern construction of the body makes possible extremely high flow rates, particularly in comparison to conventional globe valves. The proven, self-adjusting and maintenance-free Burkert packing glands ensure high sealing integrity.

Technical data	
Orifice	3/8" – 3/4" (DN10–20)
Body material	Investment casting 316L or bronze
Actuator material	PA, PPS
Plug seal material	PTFE (NBR, FKM and EPDM on request)
Media	Water, alcohol, oils, fuel, salt solution, alkali solutions, organic solvents steam at 150 PSI / 365°F
Viscosity	Max. .93 in ² /s (600 cSt, 600 mm ² /s)
Packing gland	PTFE (with silicone grease)
Media pressure	232 PSI (16 bar)
Media temperature¹⁾	14°F to 365°F (-10°C to 185°C) with PTFE seal
Ambient temperature	
PA actuator¹⁾ Actuator sizes up to Ø 40	14°F to 140°F (-10°C to 60°C)
PPS actuator Actuator sizes Ø 40	41°F to 284°F (5°C to 140°C)
Installation	As required, preferably with actuator in upright position
Control medium	Neutral gases, air
Max. pilot pressure Actuator size Ø 40	PA and PPS 145 PSI (10 bar)
Applications	Systems engineering Food processing Chemical process technology Sterilizers and autoclaves
Benefits	Available in normally open, normally closed or double acting configurations Bronze or stainless steel body High flow rate Body available as option with external thread Available with several pilot valve options

1) See chart on page 4

Technical data

Control Functions

A – 2/2-way valve, normally closed spring return

B – 2/2-way valve, normally open spring return

Control Function

I – 2/2-way valve with double-acting actuator without spring return

Operating data, valve	
Valve body material	Bronze, stainless steel
Port Connection	NPT 3/8", 1/2", 3/4"
Orifice	1/2" – 3/4"
Max. operating pressure (medium)	0 – 232 PSI 0 – 150 PSI (for steam)
Sealing material	(See materials)
Fluids	Water, alcohols, oils, fuels, hydraulic liquids, salt solutions, alkalis, steam
Temperature of medium	14°F to 365°F
Ambient temperature	14°F to 140°F
Max. viscosity	600 cSt, .93 in ² /s

Operating data, actuator	
Minimum control pressure	See pressure diagram (dependent on control function)
Max. permissible control pressure	145 PSI
Control medium	Neutral gases, air
Control connection	G 1/8"
Installation position	As required, but preferably with actuator upright

Materials

	Construction	
	Bronze	Stainless Steel
1. Valve body:	Bronze	CF-8M SS

Pressure diagrams

¹⁾Flow under seat: Minimum control pressure 58 PSI

Dimensions [mm]

For media and ambient temperature combinations above this line, a PPS actuator with FKM seals should be used.
